The following is an examiner's statement of reasons for allowance: none of the cited prior arts of the record discloses, teaches, or fairly suggests the claimed apparatus and method comprising, among other things, a first rail assembly including a rail, cap, and at least one spacer, a second rail assembly including a rail, cap for engaging media in a cassette, and at least one spacer, where the first rail assembly and the second rail assembly differ in size and the method of fastening together the rail and the cap of the cassette. The cassette further includes a cassette lid that is connected to a rail system and at least one fastener in which the at least one fastener connects the rail and cap. The invention has unique rail assembly including rail, spacer, and cap that are removably fastened together to be able to hold currency of different sizes.
